

## DIY Divorce

Many couples do not want someone else to represent them in the divorce, often to enjoy the benefits of saving money and remaining in complete control over their divorce.

**We offer three services for the do-it-yourselfer:**

**mediation management**

We help couples identify the issues to be resolved in a divorce, help them identify possible solutions to those issues, and provide them with any necessary guidance from legal and financial experts.

**legal guidance**

For people who are handling their own divorce it can be helpful to have a person experienced with divorce issues available to them on demand when they need advice, including legal advice.

**transactional help**

Courts are not consumer friendly. Some people just want help with the paperwork, pleadings and hearings. We can do this often for a fixed low cost fee.

Contact us to find out which divorce option is best for you.
